Version based on previous editions by Secretariat team.

PREFACE

I am proud to introduce to the cruise industry world the 2020 edition of the MedCruise statistical report Cruise Activities in MedCruise ports: Statistics Report 2019.

Published in May 2020, this report provides a well-known statistical analysis to the industry. This annual report reveals the previous year cruise activity and the mid-term trends in the Med and its adjoining seas, enabling an understanding of the present and future challenges.

It is an honour, as the President of such a great Association, to thank all members that contributed in making this publication possible and congratulate the MedCruise Secretariat for their excellent contribution in presenting the work of our Association. Cruise Activities in MedCruise ports: Statistics Report 2019 is among the flagship publications of MedCruise Association, being one of the studies conducted or commissioned by MedCruise to analyse the cruise industry in the second biggest region of the world.

This report analyses information of MedCruise members as well as details annual figures and trends of the four regions that compose our Association –West Med, Adriatic, East Med and Black Sea. It also contains analysis per port size and seasonality as well as comparisons with data recorded and provided by our members from the previous year. This report does not include the chapter

on the cruise traffic forecast of 2020 due to the COVID-19 sanitary crisis. The impact of this outbreak will be analysed in next editions.

MedCruise members welcomed more than 30 million cruise passenger movements -which means an 8% increase compared to the previous year- and 13,375 cruise calls in 2019. The statistics reveal the positive features in several parts of the Med and its adjoining seas. MedCruise launched two Working Groups focused on promoting the cruise industry in the regions where some ports have experienced a decline due to the economic, social and/or political instability.

In this report, the Association reveals the strength of being together, ports and associate members, to the wealth of our local communities in order to achieve a sustainable cruise growth. The President, the Board of Directors and the Secretariat support members in their efforts to invest and create more business activities in the MedCruise region, as well as, they are committed to developing the strategy and the Working Plan voted and approved by the members at the MedCruise General Assembly celebrated in October 2017 to enhance the Association position in the cruise industry.

Once again, I would like to highlight the extraordinary work that our members had done in 2019 in collaboration with other stakeholders and, above all, encourage them to continue working together and generating new opportunities with MedCruise for the future.

#PortsTogether

Airam Díaz Pastor
MedCruise President

1 | Introduction

1.1 MedCruise is the Association of the Mediterranean Cruise Ports and its Adjoining Seas since 1996

MedCruise mission is to promote the cruise industry and assist its members in benefiting from the growth of the cruise industry by providing networking, promotional and professional development opportunities. The Association not only assists its member ports but also their partners who have enrolled in MedCruise as associate members.

Today, the Association has grown up to 73 members from 21 countries and 3 continents representing more than 135 ports around the Mediterranean regions, including the West Med, Adriatic, East Med and Black Sea; plus 33 associate members, representing associations, tourist boards, ship/port agents and other cruise industry companies.

Among the objectives of MedCruise are to promote the Mediterranean region as a cruise destination; increase the efficiency of cruise port members by exchanging information on industry developments and best practices; formulate common positions on questions of common interest; develop good relations among all the cruise industry and provide its members with marketing, networking, and professional development tools and forums.

Since 2014, MedCruise is a member of the Network of Cruise and Ferry Ports, set up within the European Sea Ports Organisation (ESPO), and member of the EU Ports Forum since 2017 among other EU initiatives.

Map 1.1 provides an illustration of the geography of the members of the Association and browses the extent that MedCruise members spread in the Mediterranean and its adjoining seas.

The Association serves ports of different sizes from diverse regions, countries and cultures in one of the most dynamic cruise regions in the world – a region that offers multiple opportunities for cruising.

1.2 The Report

The annual MedCruise statistical report is among the flagship publications of the Association, as it details the actual picture of cruise activities in the Mediterranean and its adjoining seas over the past year, it reveals the trends and enables the understanding of the present challenges. It also facilitates the adjustment of MedCruise ports and associate members to contemporary market structures.

With cruise being a dynamic industry that demonstrates a remarkable capacity for growth and change, this report also provides an authoritative and most useful database and analysis of the trends in the second biggest region of the world, the Med and its adjoining seas.

MedCruise statistical report forms part of a series of studies conducted or commissioned by MedCruise that examine issues relevant to cruise ports. By advancing information exchanges on industry developments, organisation, administration and management and promoting best practices, these studies increase the efficiency of MedCruise ports and associate

members. Benchmarking and sharing of knowledge on several topics, including operational, regulatory and financial issues, are core parts of the life of the Association. These studies are also discussed jointly with cruise lines during the MedCruise General Assemblies - allowing MedCruise members to better understand the findings, identify the responses, and enjoy the most benefits possible.

The present edition of “**Cruise activities in MedCruise ports: Statistics report 2019**” has been conducted by the Secretariat, and analyses the statistical data recorded and reported by the members of the Association.

This edition is part of a long series produced by the Association for many years.

Black Sea

Burgas, Constantza, Odessa, Trabzon, Varna

In many cases, members are entities that manage and represent more than one port in the same region, which reflects the organisational heterogeneity of port governance and organisation. The total amount of ports that make up the MedCruise family is well above 135.

Moreover, 33 associate members, representing tourist boards, ship agents, port agents as well as other cruise-industry-related- organisations, also share the benefits of being part of the MedCruise family. MedCruise is in the process of a major upgrade of its associate members program, aiming to increase the prospect of the respective destinations. The list of the Associate members as of 01 January 2020 is detailed in Table 1.3.

33 ASSOCIATE MEMBERS

1.4 Evolution of the Cruise Activity in MedCruise Ports

The total number of cruise passenger movements at MedCruise Ports during 2019 reached more than 30 million. It's a record signed thanks to a +8% growth on the cruise passenger movements that took place in 2018 at the same ports. Since 2011, the total number of cruise passengers that visited MedCruise Ports never went below of 25 million.

The total number of cruise ship calls in MedCruise Ports in 2019 reached 13,375 (Figure 1.2). This figure means a +6.04% increase compared to the 12,613 cruise calls recorded in 2018. It is the second time since 2013 that the ship calls register a positive variation on the previous year, consequence of the added capacity deployed by the cruise companies in the Med.

Figures 1.1 and 1.2 Cruise Passenger Movements (millions) and Cruise Calls (miles) in MedCruise Ports, 2000-2019

Since 2000 Pax. Movements Grew by 311%

+ 8% → 1 year (2019/2018)
+ 21.2% → 10 years (2019/2010)

+ 6.04% → 1 year (2019/2018)
- 11.8% → 10 years (2019/2010)

The ratio of Transit passengers to passengers home-porting from MedCruise port members stands at 70/30. This ratio remains stable over time, as it is almost the same throughout the last 10 years. Interesting to notice how in the first year of the Association the ratio was 50/50 with homeport traffic to double in 20 years while Transit port is now more than 4 times bigger than that.

Figure 1.3 Cruise Passengers Kind Ratio, 2000-2019

70/30 Kind Ratio In 2019

Figure 1.4 Cruise Passenger's Kind, Absolute Values, 2000-2019

2019 as the greatest year
in the Med for transit traffic

1.5 Cruise Passenger Movements in MedCruise Ports in 2019

Figure 1.5 presents an overview of cruise traffic recorded at each MedCruise port member in 2019 and the annual variation comparing to 2018. In 45 MedCruise port members, the recorded cruise passenger visits increased over the past year. 9 other port members retained the levels of cruise passengers that they had recorded the year before (a port belongs to this group when its traffic's variation on the previous year is between -3% and +3%), whereas 16 members faced challenges in retaining in 2019 the numbers of cruise passenger movements hosted in 2018. In line with the MedCruise Constitution, a MedCruise Port Member might administer or operate multiple ports of the same geographical region. This might occasionally affect to specific results of the statistical analysis, for instance rankings or averages.

2 | **Cruise Activity Trends**

2.1 Global Cruise Fleet and Deployment of Cruise Fleet

The graph below shows the increase in the number of cruise ships and berths from 2000 to 2027, when it will be expected 829,000 berths and more than 500 ships. For both indicators each year should become a new record.

Figure 2.1
Global Cruise Fleet, 2000-2027 (Ships & Berths)

In 2019 More than 600.000 Berths and 404 Cruise Ships

The Mediterranean continued in 2019 being the second largest cruise destination, counting the 16.8% worldwide deployment including the Canary Islands (2%).

2.2 Contribution to the Global Economy

The cruise sector should generate more than \$133 billion in the world. Europe will account for 38.7% of this value. Regarding employment figures, in Europe had been estimated 403.621 FTE jobs (36.4% on total in the world). All indicators show a positive variation in comparison to 2016 confirming the strengths of this sector and the relevance in all parts of the world.

3

Trends in the Mediterranean and its Adjoining Seas

3.1 Evolution of Cruise Traffic (2015-2019)

This section provides the analysis of cruise passenger movements and cruise ship calls in the ports of MedCruise members. This analysis is based on data recorded by MedCruise Port members, which represent a sample of an estimated 80% of cruise calls and 78% of passengers that cruise the Mediterranean and its adjoining seas per year. Therefore, this analysis provides an accurate understanding of the cruise activity trends in the second biggest cruise region of the world.

The full list of ports included in this analysis, along with the raw material for passenger movements and cruise calls for 2019 as well as for the five previous years (2015-2019) can be found in the Appendix of this report. In total, 30,180,222 cruise passenger movements were registered in MedCruise Ports in 2019 (Table 3.1), which means a 7.83% increase in passenger movements compared to the previous year. The 5-year-variation of cruise passenger movements represents also an increase (+10.71%). It helps to reiterate that 2019 passenger movements represent the record at the time.

- 30,180,222 cruise passenger movements were registered in MedCruise port members in 2019.
- Annual variation: 7.83% more cruise passenger movements than in 2018.
- In 2019 for the first time more than 30 million passengers' movements recorded in the Mediterranean and its adjoining seas

Table 3.1 Evolution of Cruise Traffic in MedCruise Ports, 2015-2019

Year	Total Pax	% variation on previos year	Total Calls	% variation on previos year	Pax/Call	% variation on previos year
2019	30,180,222	7.83%	13,375	6.04%	2,256	1.68%
2018	27,989,197	8.00%	12,613	3.90%	2,219	3.94%
2017	25,915,573	-4.12%	12,139	-7.33%	2,135	3.46%
2016	27,028,895	-0.85%	13,099	-0.21%	2,063	-0.64%
2015	27,260,071	5.83%	13,127	-4.19%	2,077	10.48%
Variation 2019/2015		10.71%		1.89%		8.66%

3.2 Major MedCruise Ports

In 2019 the 10 major MedCruise Ports - in terms of cruise passengers - hosted a total of 18.5 million passenger movements, for a strong +9.23% variation over 2018 (Table 3.2).

All ports included in the top 10 registered positive variations over 2018, ranging from the 26.92% of Valletta member to the 3.15% of Barcelona.

For the second year the Port of Barcelona exceeds the threshold of 3 million cruise passenger movements. For the first time, the second biggest cruise port in the Med was Balearic Islands. The Port of Valletta enters the top10 this year (it ranked 13 in 2018).

The 5-year-variation, considering the similar traffic data of 2018 and 2015, is also around +19%, with Valletta to lead the ranking with +35.04% followed by Balearic Islands (+33.14%) and Marseille (+28.59%).

Total (Major -10)			18,466,562	16,905,453	9.23%	15,523,631	18.96%

2019:

The major Mediterranean cruise port, Barcelona, reaches an all-time record, for the second consecutive year, hosting more than 3 million passenger movements.

2015:

Two ports hosted more than 2,5 million passenger movements for the 2nd time in history- the first time was 2013.

2008:

The first time that a single Med port hosted more than 2 million passengers.

2003:

The first time that a single Med port hosted more than 1 million passengers.

As far as the cruise calls are concerned, the 10 MedCruise major ports reached a total of 6,138 (Table 3.3), a +6.03% up on the previous year. At the first 3 positions the same members of 2018: Balearic Islands, Barcelona and Civitavecchia. The highest variation 2019/2018 is the one of Dubrovnik / Korcula as well as the biggest positive 2019/2015.

Balearic Islands reached the top position of this ranking with 819 calls in 2019. This equals a decrease of 40 calls, or 4.66% comparing to 2018. Barcelona and Civitavecchia / Fiumicino / Gaeta go right below on the list, with 800 calls each one.

Cruise Calls

2019

The most called Mediterranean cruise member is Balearic Islands with an average of 2.2 call each day of the year.

2019

Cruise calls got back to the 2014 value.

Table 3.3 Major MedCruise Port Members per Cruise Calls, 2019

Rank 2019	Rank 2018	Port	Total Calls 2019	Total Calls 2018	2019/2018	Total Calls 2015	2019/2018

Total (Major -10)			6.138	5.789	6.03%	5.712	7.46%

In total, 38 cruise ports recorded home-porting activities in 2019, embarking and disembarking passengers. The 10 biggest of them hosted, in aggregate, a total of almost 8 million Home In/Out passengers, 810,367 more (+11.32%) than in 2018 (Table 3.4).

Barcelona remains as the most popular cruise home-port in the Med, with more than 86,000 Home In/Out passengers compared to 2018. Venice also remains at the second position with a 5.23% positive variation in the previous year. Civitavecchia/Fiumicino/Gaeta reached, together as member, the third position, overcoming Genoa/Savona.

Comparing with 2015, the 2019 top10 MedCruise members per Home In/Out passengers show a total significantly higher (+22.19%). In a top10 characterized by positive variations, the negative ones have been collected by Genoa / Savona together with Marseille.

**Home in/
Home out**

•In 2019: all MedCruise Members of the TOP10 recorded growth in home-port traffic with the entire area growing as cruise destination.

Table 3.4 Major MedCruise Port Members per Home In/Out pax, 2019

There Is a High Concentration of Turnaround Traffic in Few Cruise Ports

(Half of Home In/Out Cruisers are in the First 4 Port Members)

10	(12)	Naples / Salerno / Castellammare di Stabia	230,611	99,473	131.83%	126,672	82.05%
Total (Major -10)			7,971,584	7,161,217	11.32%	6,523,883	22.19%

In a year with relevant higher traffic on the previous one, also the total Transit cruise passengers in the major MedCruise Ports registered has grown, showing a positive variation of 7.42% (Table 3.5). All the ports in this Top 10 contributed to generating the overall positive variation, particularly Marseille, Naples/Salerno/Castellammare di Stabia and Genoa/Savona.

Balearic Islands returned to the top of the list of the major cruise ports in terms of Transit passengers after one year, as recorded a growth of 6.53%. In 2019, the number of visiting cruise passengers in Balearic Islands was 1.68 million. Comparing to five years before (2015), Balearic Islands hosted +16.14% or around 130,113 more Transit passengers in 2019.

The 10 major Med ports in terms of Transit passengers hosted significantly more passenger movements (11,32 million) than those they had hosted five years earlier, back in 2015 (8,81 million). Genoa/Savona is the member that tops the list in terms of percentage growth within these five years (49.35%), followed by Marseille and Genova/Savona. In absolute values, around 0.9 of the 2.5 million passengers come from Balearic Islands, Marseille and Corfu.

TRANSIT

• 2018: for the third time five members hosted more than 1.000.000 Transit passenger movements (first time in 2013, second in 2015)

• 2007: The first time that a single Med port (Naples) hosted more than 1.000.000 million Transit passengers.

• 2000: Balearic Islands topped the list hosting 355.566 Transit cruise passengers. It would rank as 20th biggest port in the Med in 2016.

Table 3.5 Major MedCruise Port Members per Transit Pax, 2019

Genoa/Savona, Marseille and Corfu Had all Together 0.9 Million Transit Passengers More Than in 2015

3.3 Major Variations in MedCruise Ports

This chapter tables show the major variations when comparing cruise traffic, in terms of total cruise passenger movements (Table 3.6), cruise calls (Table 3.7), Home In/Out passengers (Table 3.8) and Transit passengers (Table 3.9). It's a way to shed light on ports that can't be included in rankings on absolute values. In order to better understand the trends, these tables provide both a short-term view by comparing data recorded in 2019 to 2018, as well as a medium-term perspective by comparing cruise passengers and cruise call statistics of 2019 with those of 2015.

Remarkable variations of the total passenger movements hosted by each port in the Med were observed within just one year. In 2019, the three ports that experimented the major variation to the previous year (2018) are Egyptian Ports, Taranto and Castellón (Table 3.6) while Palermo and Civitavecchia/Fiumicino/Gaeta recorded the largest growth in 5 years.

Table 3.6 Total Cruise Passengers - Major Variations 2019/2018 and 2019/2015

Port	2019	2018	Var. 2019/2018	Port	2019	2015	Var. 2019/2015
Egyptian Ports	72,964	1,160	6190.0%	Palermo	532,973	314	169636.6%
Taranto	9,205	658	1298.9%	Civitavecchia / Fiumicino /Gaeta	2,652,403	6.563	40314.5%

Transit passenger movements show different variations. Compared to the previous year, 2019 transit passengers in Egyptian Ports added almost 72,000 passengers to the 1,160 transit passengers of 2018. The Port of Taranto counted more than 9,000 transit passengers with an increase of 1300% compared with 2018. In 5 years, Port of Taranto, with more than 9,200 transit passengers, shows an increase of 2800% compared to 2015.

Table 3.9 Total Transit Passengers - Major Variations 2019/2018 and 2019/2015

3.4 Passengers per Call

The deployment of bigger vessels in the Mediterranean and the adjoining seas is evident by the continuous increase of the average number of cruise passengers that reach a destination per call. In 2019, the average number of hosted passengers per cruise call was 2,256.

The increase within the last two decades is even more impressive. In 2000 each cruise call in the Med was resulting in 813 passenger movements on average. Within 10 years, the average number of passengers per call moved up to 1,577 for each call, resulting in the new record of 2,256 in 2019 (Figure 3.1).

MEDCRUISE TRENDS

•2019: MedCruise Member ports averaged 2,256 passenger per call.

•2015: for the first time the (average) number of cruise passenger per call surpassed 2.000 pax.

• 2000: the value was only 813 per call.

4

Analysis Per Medcruise Region

4.1 The MedCruise Regions

MedCruise membership spreads in four distinctive geographical regions, each of them having its own dynamics. These regions are West Med, Adriatic, East Med and Black Sea. This section of the report provides an analysis of the statistics per MedCruise region (Map 4.1).

Map 4.1 Cruise Traffic by MedCruise Region in 2019

A total of 40 MedCruise members are located in the West Med region (Table 4.1). The cruise passenger movements that took place in these ports in 2019 reached 22.5 million, that equals to 8,860 total cruise calls. West Med is definitely the biggest region of the four in terms of the share of cruise activities; it hosted 74.4% of the total passenger movements and 66.4% of the cruise calls.

MedCruise has intensified its efforts to support the strategy of these ports to regain cruise activities among others by hosting international gathering of cruise stakeholders in its member ports located in the Black Sea.

Table 4.1 Total Cruise Traffic per Region, 2019

Region	No of Members	Total Pax Movements	Total Cruise Calls	Transit Pax Movements	Home In/Out Pax Movements
West Med	40	22,467,662	8,860	15,896,434	6,569,845
Adriatic	12	5,435,434	3,019	3,572,330	1,859,058
East Med	15	2,275,926	1,494	1,602,419	711,374
Black Sea	5	1,200	2	1,200	0
Total	72	30,180,222	13,375	21,072,383	9,140,277

Figure 4.1 Cruise Passenger Traffic Shares per Region, 2019

3 Out of 4 Cruise Passengers Have Been Welcomed in West Med Ports

Cruise Calls

Cruise Pax. Movements

The four sub-regions have distinctive features as regards the type of cruise vessels that are deployed in each of them (Figure 4.2). Larger cruise ships are deployed in the West Med, where the average number of cruise passengers per call stands at 2,536. The Adriatic is the region where the second highest average of passengers/call is recorded (1,800), with the maximum observed at an Adriatic port being 3,494 passengers. Adriatic is the third in terms of MedCruise members (12) but the second biggest MedCruise region in terms of cruise activity. Cruise ships deployed in the East Med are even smaller, i.e. 1,523 passengers/call. The region where the smaller cruise ships of all are deployed is the Black Sea (average 600 passengers per call); Black Sea ports recorded just two (2) calls during 2019.

Figure 4.2 Average Cruise Passengers/Call per Region, 2019

4.2 Cruise Traffic Evolution per Region

Table 4.2 details the evolution and variation of cruise passenger movements, providing a picture of both short and mid-term trends. Adriatic stands as the most dynamic region with a 21.10% growth since 2015, and 11.20% growth comparing to 2018. The growth in West Med was 14.20% within five years term and 4.70% within one year term.

East Med and Black Sea are also shown positive numbers in 2019. Comparing to 2018, East Med dropped a quarter of its passenger movements the last five years but in 2019 registered 39.10% more passengers movements than 2018. Also Black Sea- the most dynamic region in 2014- dropped almost 100% of the traffic within the last five years. It seems today that the expectations for a durable stable external environment have confirmed and cruise activities are about to re-emerge. Black Sea registered 1,200 passengers movements in 2019. In 2018, Black Sea had zero passengers movements. The evolution of traffic concentration per region chart is particularly interesting (Figure 4.3), with West Med to remain dominant but steady and Adriatic gradually to increase its share.

Table 4.2 Total Cruise Passenger Movements Variations per Region

All Four Regions are Growing

Region	2019	2018	Variation 2019/2018	2015	Variation 2019/2015
West Med	22,467,662	21,463,157	4.7%	19,681,872	14.2%
Adriatic	5,435,434	4,889,351	11.2%	4,492,976	21.0%
East Med	2,275,926	1,636,689	39.1%	3,033,790	-25.0%
Black Sea	1,200	0	100.0%	51,433	-97.7%
Total	30,180,222	27,989,197	7.83%	27,260,071	10.7%

Figure 4.3 Cruise Passenger Movements Evolution per Region

The Adriatic and East Med Shares are Increasing

● West Med ● Adriatic ● East Med ● Black Sea

As regards the total number of cruise calls per region (table 4.3), the development of the four sub-regions were diverse. All but west med registered higher numbers of calls when comparing 2019 to the calls registered a year earlier. East Med (+41.30%) and Black Sea (100.00%) seem to recover gradually the traffic lost the last years. In Adriatic (+12.50%) remained almost stable, while the decline was marginal in the case of the West Med ports (just 0.10%). Looking at the 5-year trend, West Med and Adriatic ports have a single (+6.50%) and double-digit (+18.70%) increase accordingly. The decline was a significant one in the case of the East Med, where cruise calls declined by 32.00%, and even more significant in the Black Sea (-96.80%).

Following these developments, the share of cruise calls in West Med ports increased in the last five years from 63.4% of calls in the Med to 66.4%. The percentage of the Adriatic increased from 19.4% to 22.6%, while East Med and the Black Sea have seen their respective shares of the total cruise calls in the Med declining (figure 4.4)

Table 4.3 Total Cruise Calls Movements Variations per Region

West Med and Adriatic Ports
Grew in the Past 5 Years

Region	2019	2018	Variation 2019/2018	2015	Variation 2019/2015

Adriatic	3,019	2,683	12.5%	2,544	18.7%
East Med	1,494	1,057	41.3%	2,197	-32.0%
Black Sea	2	0	100.0%	63	-96.8%
Total	13,375	12,613	6.04%	13,127	1.89%

Figure 4.4 Cruise Calls Evolution per Region

Adriatic Ports Kept
Same Share

● West Med ● Adriatic ● East Med ● Black Sea

The West Med is the region where most home-porting activities are happening (Table 4.4). East Med homeporting activities show a remarkable annual increase of 72.40%, followed by West Med homeporting activities with 31.00%. The total amount recorded in 2019 was 30.08% more homeport passenger movements than 2018 and 20.50% than five years ago.

Figure 4.5 illustrates the shares of Home In/Out passengers per MedCruise region since 2015. Within this period the share of the West Med increased to reach 71.80% while the ones for the other 3 regions declined.

Table 4.4 Total Home In/Out Passenger Movements Variations per Region

Home In/Out Mov Increased Significantly in the East Med since the Last Year

Region	2019	2018	Variation 2019/2018	2015	Variation 2019/2015
West Med	6,569,845	5,013,541	31.0%	5,220,561	25.8%
Adriatic	1,382,131	1,233,543	12.0%	1,043,563	32.4%
East Med	711,374	412,712	72.4%	757,091	-6.0%
Black Sea	0	0	0.0%	689	-100.0%
Total	8,663,350	6,659,796	30.08%	7,021,904	23.38%

Figure 4.5 Cruise Home In/Out Passenger Movements Evolution per Region

Home In/Out Mov. Confirmed the Increasing Concentration of Med Traffic in the Western Region

● West Med ● Adriatic ● East Med ● Black Sea

In total, on an annual basis transit passengers in the Med and its adjoining seas increased in 2019 by 5.87% and equal to 21,072,383 passengers. This growth is the outcome of the increase of 2019 traffic of transit passengers in all four Med regions, West Med (+2.50%), Adriatic (+12.50%), East Med (+31.60%) and Black Sea (+100%).

In terms of market share (Figure 4.6), West Med region handles almost five times more traffic than the second region in transit passenger movements market, the Adriatic.

Table 4.5 Total Transit Passengers Variations per Region

Adriatic Recorded the Highest Growth 2019/2018

Region	2019	2018	Variation 2019/2018	2015	Variation 2019/2015

The Concentration in Transit Pax Is Even Higher than the One in Home In/Out

● West Med ● Adriatic ● East Med ● Black Sea

4.3 The MedCruise Growth Indexes (MEDGRI)

In order to facilitate the monitoring of cruise activity trends in the Mediterranean and its adjoining seas, MedCruise established two indexes aiming to give a clear picture of the evolution of cruise passenger movements and cruise calls respectively, in each of the four MedCruise regions, as well as in the Med as a whole, since 2010.

MEDGRI_{pax} (Figure 4.7) is the index that monitors the annual trend of cruise passenger movements in the Med and in each of the four regions in terms of passenger movements. The index has 2010 as the basis year (MEDGRI_{pax}=100). The figure presents the evolution since the base year, easily showing a period marked by variations of opposite sign ending in 2019, with the highest index (MEDGRI_{pax} = 121).

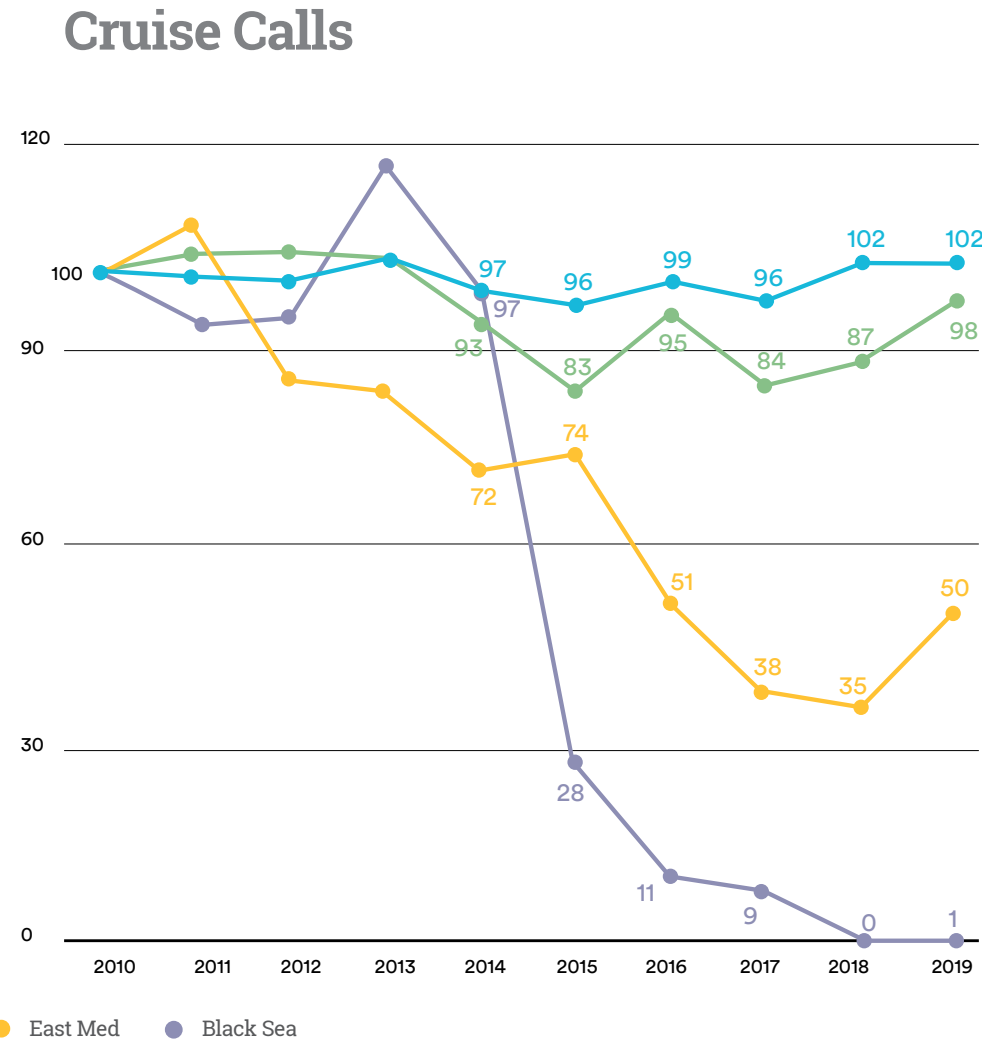

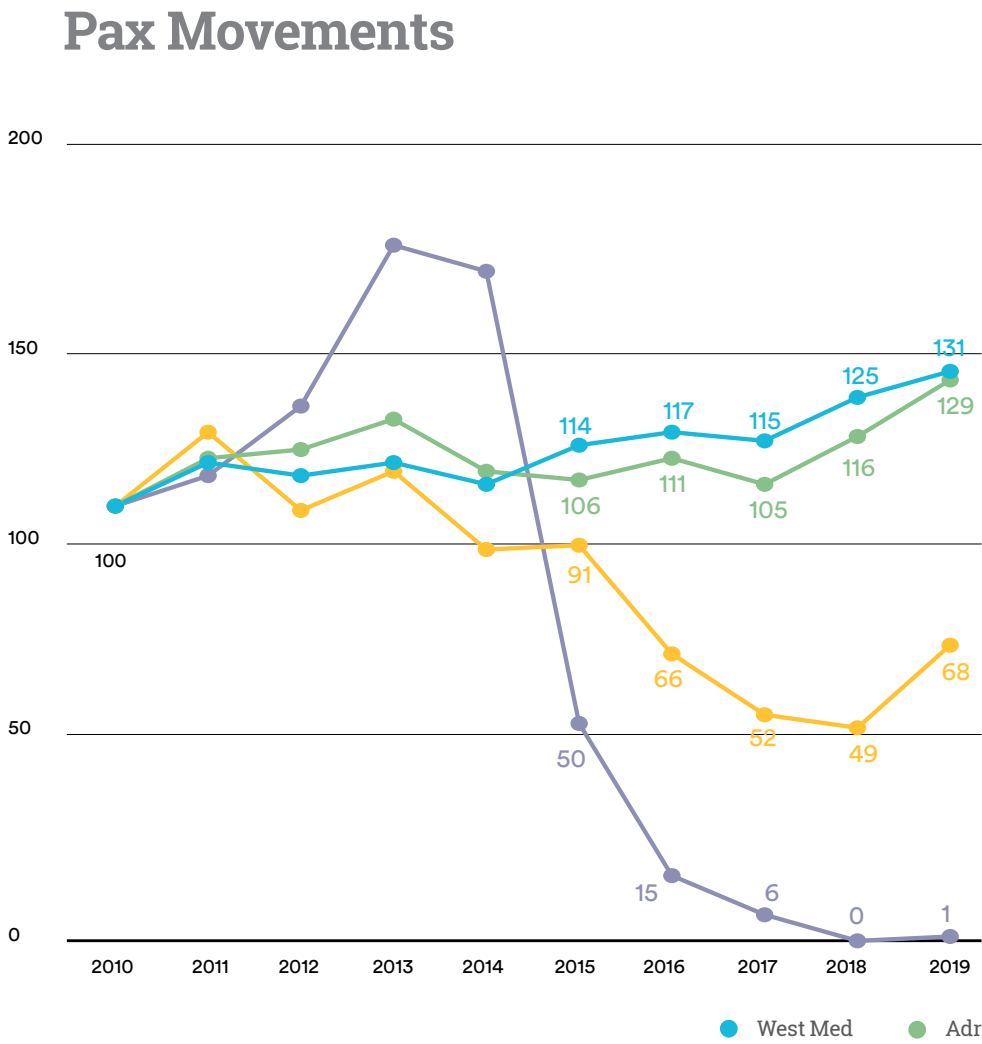

Figure 4.7 MEDGRI Trends: the MedCruise Growth Indexes (2010=100)

Looking at regional trends Black Sea ports that had experienced the most remarkable growth of all regions in 2013 and 2014, returned in 2015 to half the levels of 2010 (as the index in the particular case stands at 57), and to just 1 in 2019. The index is lower (68) in the case of East Med region as well, though one year before MEDGRI_{pax} in the East Med was standing at 115, the highest level of all in the particular year. The two other regions continue to host more cruisers than those they were hosting in 2010, with the respective 2019 values of MEDGRI_{pax} standing at 129 in the Adriatic and at 131 in the West Med case.

MEDGRI_{calls} monitors the annual trend of cruise calls in the Med and in each of the four regions, having again 2010 as the basis year (MEDGRI_{calls}=100). The evolution of MEDGRI_{calls} is illustrated in the 4.9 figure. Cruise passenger numbers in the Med and its adjoining seas are more than in the past, but the number of vessels is lower than those of 2010 in all regions except in the West Med, where the 2019 index (MEDGRI_{calls}=102) is over 100. While a MEDGRI_{calls}=98 had been recorded in the Adriatic, in East Med the increase of the number of cruise calls (2019 MEDGRI_{calls}=50) is lower than the one of cruise passenger movements.

Figures 4.8 and 4.9 MEDGRI Trends: the MedCruise Growth Indexes (2010=100)

The following figures provide visualised information on the evolution of Home In/Out shares per region, as well as on those of the Transit passenger movements compared to the total of the cruise passengers recorded in each of the four MedCruise regions per year. In 5 years, the Home In/Out versus Transit passengers ratio didn't change significantly in the West and East Med.

Figures 4.10 and 4.11 Home In/Out vs Transit Passenger Shares Evolution per Region

Home In/Out Movements

Transit Pax Movements

4.4 Major Ports per MedCruise Region

In this section the reader might find a presentation of the major ports per region, an overall picture of the variation of passenger movements and cruise calls when comparing the activities of 2019 with those of 2018, as well as a similar comparison with the passenger movements and calls that had been recorded in 2015.

Table 4.6 Major Ports per Region: Total Cruise Passenger Movements

Dubrovnik Is Still the First Port in Adriatic for Transit Passengers

4.5 Cruise Traffic per Country

MedCruise members spread in 21 different countries in the Mediterranean and its adjoining seas. The fact that MedCruise members represent in most cases the vast majority of the total cruise activities per country allows meaningful conclusions on the trends observed. It is acknowledged though this is not in all cases the total traffic within the country, as the numbers of reporting might not always correspond to the total of cruise ports in the respective country. Figures below present the shares of cruise activities per major country.

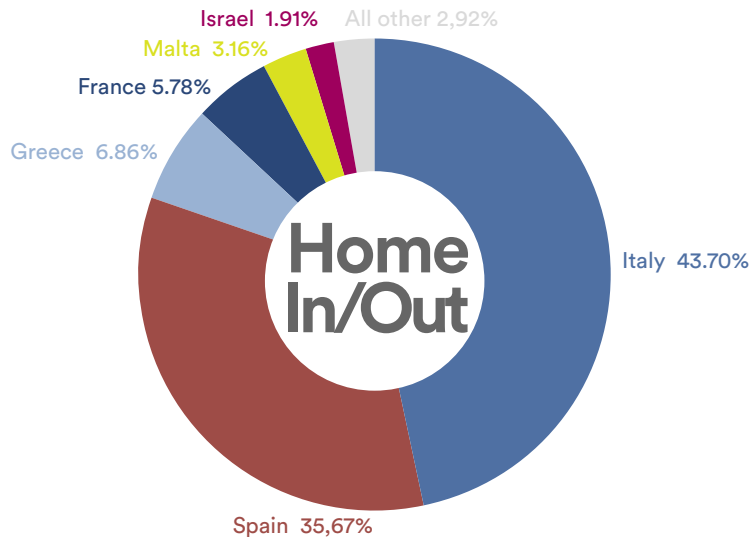

Table 4.10 lists the cruise passenger movements that were recorded in 2019 per country and the respective variations observed when comparing these data with those of previous years. Italy confirms its leading role and shows the annual highest growth.

Table 4.10 Cruise Passenger Movements per MedCruise Country

Total	30,180,222	100.00%	27,989,197		27,260,071	

Considering the annual variation of cruise calls per country (Table 4.11), Egypt and Cabo Verde are shown the highest, although with small numbers, followed by Italy.

The medium-term trends of the number of cruise calls per country indicate that Israel, Slovenia and Croatia are the ones that within the period 2015-2019 experienced major increases in the number of calls. Among the first 5 countries, France experienced a decrease in calls.

Table 4.11 Cruise Calls per MedCruise Country

5

Analysis Per Medcruise Port Size

5.1 Categories of MedCruise ports per Size

This section presents an analysis of cruise traffic developments based on the size of MedCruise port members. The 72 MedCruise port members are divided in two categories based on the total cruise passenger movements per year. Both category A and B contain 36 ports. These are the two categories

140,000

Category B

36 port members with less than 140,000 cruise passenger movements in 2019

Category A

36 port members with more than 140,000 cruise passenger movements in 2019

Major ports (Category A) have different needs and different growth strategies from the smaller ones (Category B). The diverse quests and problems of infrastructure, the hosting of dissimilar kind of operations and, in several times, the different types of cruise companies to deal with, make worth the examination of the trends within each of these categories in order to understand the dynamics observed.

Figures 5.1 and 5.2 detail the list of MedCruise port members included in Category A and B (see also the Appendix for the list of ports included in each of these categories). In total, 24 of the 36 ports of Category A are located in the West Med. In terms of passenger movements hosted per year, among the major 10 members only two are not ports of West Med. These are Venice in Italy and Piraeus in Greece. In category A, seven ports are located in the Adriatic and five ports in the East Med with Piraeus being the only among these 12 ports, that hosted more than 1 million passenger movements. None of the Black Sea ports are included in Category A group of ports as all ports in the region recorded less than 140,000 passenger movements in 2019. The geographical distribution of this group of ports in the four regions is more balanced for category B.

Figures 5.1 and 5.2 MedCruise Ports per Region - Category A and B

5.2 Cruise Traffic by Size

Table 5.1 presents the major variations as regards total passengers, cruise calls, home in/out and transit passengers in the case of each of the two size categories.

Table 5.1 Cruise Traffic Variations by Size Category

The Annual Growth Gets Even Stronger in Both Categories in All Type of Traffic

		2019	2018	Variation 2019/2018	2015	Variation 2019/2015
Total pax movements	A	29,095,268	27,217,250	6.90%	25,780,346	12.86%
	B	1,084,954	771,947	40.55%	1,479,725	-26.68%
Cruise calls	A	12,110	11,673	3.74%	11,761	2.97%
	B	1,265	940	34.57%	1,366	-7.39%

	B	109,922	37,570	192.58%	277,298	-60.36%
Transit	A	20,060,867	19,169,941	4.65%	17,533,425	14.41%
	B	1,011,516	734,377	37.74%	1,202,137	-15.86%

Figure 5.3 Cruise Traffic Evolution by Size Category

36 Ports Represent 96.0% of Total Pax and 91.0% of Total Calls

The overall positive variations 2019 on 2018 can be found both on the categories A and B. The share of Category B ports remains a minor share of the total cruise passengers that visit the Mediterranean and its adjoining seas. It's evident how the variations attributed to group B are much more higher than the ones marked by group A, but this should be explained, together with the good performances, through the absolute values which, being enormously lower, are subject to much more pronounced jumps, when downward as well as upward. Figure 5.3 clearly shows how to evaluate the Med: the ports included in the first group (A) influence and characterize the performances of the region, but it is also evident that all the other ports with less traffic, whereas do not relevantly impinge on the overall dimensions are crucial for the choices of deployment made by the cruise companies.

5.3 Variations by Size Category per Region

Table 5.2 details the distribution of the total passenger movements hosted in 2019 by the ports of each size category per region, together with the variations on the previous year and in a 5-year horizon. In terms of annual variations (2019/2018), the Category A ports located in the Adriatic lead the ranking, but in absolute values the ones located in the West Med contributed to the growth of the group with more than 800,000 passenger movements (out of around 1.9 million). The 5-year-variations showed a decrease in the traffic in the East Med area (-0.46%) while in the same period the Adriatic ports of Category A grew of 17.84% and the West Med ones of 13.18%.

Performances in 5 years had been quite different considering the Category B ports which belong to the single areas. The ones located in the West Med did not grow as the ones of Category A and the Adriatic ones registered in 2019 around 71,000 passenger movements more than in 2015. The East Med ports gained around 75,600 movements. A dramatic collapse had characterized the ports located in the Black Sea, bringing the 51,433 pax. movements registered in 2015 to 1,800 in 2019.

Table 5.2 Variations by Size Category per Region: Total Passenger Movements

“A” and “B” Ports Grew

	Pax movements	% of total 2019 of each category	% of total 2019	2019	2018	Variation 2019/2018	2015	Variation 2019/2015
A	West Med	75.10	72.40	21,851,543	21,011,878	4.00%	19,306,486	13.18%
	Adriatic	17.69	17.06	5,148,396	4,673,605	10.16%	4,368,848	17.84%
	East Med	7.20	6.94	2,095,329	1,531,767	36.79%	2,105,012	-0.46%
B	West Med	56.79	2.04	616,119	451,279	36.53%	375,386	64.13%
	Adriatic	26.46	0.95	287,038	215,746	33.04%	124,128	131.24%
	East Med	16.65	0.60	180,597	104,922	72.13%	928,778	-80.56%
	Black Sea	0.11	0.00	1,200	0	100.00%	51,433	-97.67%

In the variations 2019/2018 of cruise calls (table 5.3) is interesting to notice that West Med ports of Group A received 3% less cruise calls than in 2018.

For Home In/Out (table 5.4), Group B East Med ports recorded an impressive increase: in 2018 recorded 1,638 home in/ out pax movements and in 2019 almost 60,000. Of course, this number is 78% lower than in 2015.

Last, for transit pax (Table 5.5), Adriatic ports show short and mid-term growth in both A and B categories. In Group A, East Med recorded 30% increase of the transit pax movements since last year and in Group B 54%.

6

Seasonality Analysis

6.1 Seasonality in MedCruise Ports

The seasonality of cruise activities in MedCruise Ports is the theme of this section of the report. The focus is on how cruise traffic is distributed on a monthly and seasonal basis. The report also discusses the observed variations depending on the size or the region where a port is located.

Figure 6.1 illustrates the shares of passenger movements and cruise calls per month in 2019. The highest share of both cruise passenger movements and calls in 2019 were recorded in October (13.62% and 14.86%, respectively). Notably, the same happened in the years 2014-2018 as well, when October hosted around 14% of the cruise traffic in these years. From May to October the shares per month have never been lower than 10%, both per passenger movements and calls. The longer distance between the passenger movements share and call share is registered in July and August.

Figure 6.1 Cruise Traffic Shares per Month, 2019

Figures 6.2 and 6.3 Total Traffic per Month, 2019

Cruise Passenger movements (in thousands)

Cruise Calls

As usual, cruise traffic in Med is mostly centred around warmer months. In 2019, from May to October, there were 72.87% of the total passenger movements and 71.47% of calls in the ports of the Association. The month of February had less traffic, but overall, the winter months (January, February and December) contributed by generating 7.70% of the total passenger movements and 7.99% of the total calls.

Figure 6.4 presents the average number of passengers per cruise call during each month of the year. The variations per month, as expected, are significant and follow the ones of the total traffic except for the months of January and February. In August, the number of passengers per call appears to be 39.9% higher compared to the respective ratio of December. August is the month of 2019 with the highest rate of passengers per call (2,641), followed by January (2,607) and July (2,543). The lowest rates are registered in December (1,888) and May (2,076).

Figure 6.4 Average Pax/Call per Month, 2019

July and August Share the Leading Position

6.2 Seasonality by Region in 2019

The four distinctive regions in which MedCruise membership spreads (West Med, Adriatic, East Med, Black Sea) register different seasonality trends distributions (Table 6.2).

In West Med the cruise traffic is distributed in a more balanced way throughout the year. Cruise activities in West Med during the winter months correspond to a 9.54% share of the total cruise passenger movements in the region, while 33.58% takes place during the summer.

In the Adriatic and in the East Med, cruise traffic is concentrated mostly during the second and third trimester of the year, in particular the period commencing in June and ending in November. The passenger movements in the Adriatic and in the East Med during the winter months (Dec-Feb) correspond to a minimum of 1.36% and 4.21% of the total traffic taking place in the regions on an annual basis.

Table 6.2 Trimester Shares of Cruise Traffic within the MedCruise Regions

The Four Variables Show Similar Trimester Trends, Even If Home-Port Traffic in Medcruise Port Members Is Higher in Summer and Lower in Winter

Region	Home In/Out Passengers				Total Calls			
	Mar-May	Jun-Aug	Sept-Nov	Dec-Feb	Mar-May	Jun-Aug	Sept-Nov	Dec-Feb
West Med	24.55%	33.58%	32.33%	9.54%	27.36%	28.40%	34.82%	9.42%

6.3 Seasonality by Size in 2019

Table 6.3 details the shares of the total cruise traffic that corresponds to each trimester of 2019 within the two different port size categories of MedCruise.

Category A ports (ports hosting more than 140,000 passenger movements in 2019) recorded a higher share of the annual passenger movements hosted during the winter season (7.78%) compared to the respective share observed in Category B ports (5.35%), but not in terms of calls (7.80% vs 9.84%).

The seasonality in terms of passenger movements is quite similar for the two groups, while the distribution of the calls differs, particularly in the March-May and June-August trimesters. Comparing the differences between the seasonality in the two port categories, they are quite relevant for the Home In/Out traffic, while less significant for the Transit passengers.

Table 6.3 Trimester Shares of Cruise Traffic within the Two Size Categories

No Big Differences Between the Categories A and B in terms of Seasonality

	Size Category	Mar-May	Jun-Aug	Sept-Nov	Dec-Feb
Cruise Pax Movements	A	23.57%	35.76%	32.89%	7.78%
	B	21.78%	36.08%	36.79%	5.35%
Cruise Calls	A	25.06%	32.49%	34.66%	7.80%
	B	26.03%	29.05%	35.08%	9.84%
Home In/Out	A	22.85%	37.08%	33.37%	6.71%
	B	11.23%	54.06%	33.97%	0.75%
Transit Pax	A	23.90%	35.16%	32.68%	8.26%
	B	22.65%	34.68%	36.94%	5.73%

6.4 Seasonality of Cruise Activity in MedCruise Ports

Seasonality trends in the major five ports in the Med do not differ remarkably from those of the total sample. The only exception to the rule is Genoa/Savona where the summer months stand under 10% of share, showing a sharp decline of the curve between April and October when it's peaking. The other 4 ports register movements that do not exceed 4% of their total annual traffic in January, February and December, and over 10% between May and October.

Figure 6.5 Major 5 MedCruise Ports Cruise Pax Seasonality, 2019

The following tables present MedCruise Ports registering the major concentration of their cruise activities during each of the four trimesters, from Spring to Winter.

Table 6.4 Highest Concentration of Passenger Movements (March/April/May, 2019)

7

Cruise and Ferry Traffic In Medcruise Ports

7.1 MedCruise Ports Hosting Cruise and Ferry Traffic

This section provides a new analysis of passenger movements in the MedCruise port members. It is interesting to notice how just the sum of the two kinds of traffic (cruise + ferry) generates new rankings highlighting different ports and areas.

The full list of ports included in this analysis, along with the raw material for ferry passenger movements and ferry calls for 2019, are available at the end of the section. It had been collected ferry traffic data from 60 members with 18 of them to declare no ferry traffic in 2019. The MedCruise members which provided both data on cruise and ferry (included the ones which declared to have had no ferry traffic) hosted more than 106 million ferry passengers in 2019 (106,641,026; with 389,833 ferry calls).

- MedCruise port members ports hosted more than 106 Million ferry passengers in 2019

- At least 390,000 ferry calls had been recorded

- Each day of the year around 1.000 ferries call a Med-Cruise member port

Figures 7.1 and 7.2 Passengers traffic in MedCruise Ports, cruise vs. ferry, 2019

Passenger Movements

- Cruise
- Ferry

Ship Calls

- Cruise
- Ferry

Table 7.1 shows the ranking of Top10 MedCruise port members for total passengers. Three members – Piraeus, Livorno/Piombino/Portoferraio and Messina -hosted in 2019 more than 10M ferry passengers and more than 11M adding the cruise passengers. Balearic Islands and Naples/Salerno/Castellammare di Stabia exceeded the 8M threshold. Barcelona, that leads the ranking for cruise traffic, is only at the tenth place of this ranking.

Table 7.1 Major MedCruise Port Members for Total Passenger Movements (cruise + ferry)

9	Bastia/North Corsica	France	West Med	2,473,503	2,648	934.1
10	Souda/Chania	Greece	East Med	1,217,124	1,422	855.9

Note: table 7.6 and 7.7 exclude port members with no ferry traffic or no cruise traffic

Elaborations have been done to explore the profile of a port limited to the passenger traffic in order to understand if and how one of the two components (cruise and ferry) can be predominant. Only ports which hosted in 2019 both kind of traffic had been considered. Easy to envisage, there are many ports in which the ferry traffic represents the large majority of their passenger traffic, exceeding the 95% (Table 7.6).

Table 7.6 MedCruise Port Members with the Highest Ferry Pax Traffic Share on Overall Traffic

Many MedCruise Members with Reduced Cruise Traffic are Strong in Ferry Traffic

No.	Port	Country	Region	Cruise Pax	Ferry Pax	Ferry Share
1	Igoumenitsa	Greece	East Med	1,053	2,772,401	99.96%
2	Canarian ports	Spain	West Med	1,930	5,015,666	99.96%
3	Ceuta	Spain	West Med	9,351	2,101,173	99.56%
4	Kavala	Greece	East Med	2,699	479,719	99.44%
5	Bastia/North Corsica	France	West Med	23,454	2,473,503	99.06%
6	Tangier	Morocco	West Med	36,986	1,610,869	97.76%
7	Huelva	Spain	West Med	1,409	43,244	96.84%
8	Messina	Italy	West Med	422,732	10,755,431	96.22%
9	Motril-Granada	Spain	West Med	9,413	232,978	96.12%
10	Volos	Greece	East Med	12,574	300,457	95.98%

Table 7.7 MedCruise Port Members with the Highest Cruise Pax Traffic Share on Overall Traffic

No.	Port	Country	Region	Cruise Pax	Ferry Pax	Ferry Share
1	Gibraltar	Gibraltar	West Med	328,057	2,025	99.39%
2	Alanya	Turkey	East Med	14,138	4,134	77.38%
3	Catania	Italy	West Med	208,509	82,657	71.61%
4	Barcelona	Spain	West Med	3,137,918	1,490,644	67.79%
5	Portimao	Portugal	West Med	22,861	14,087	61.87%
6	Madeira Ports	Portugal	West Med	596,818	370,757	61.68%
7	Civitavecchia	Italy	West Med	2,652,403	1,804,201	59.52%
8	Marseille	France	West Med	1,865,918	1,271,437	59.47%
9	Dubrovnik, Korcula	Croatia	Adriatic	804,881	613,519	56.75%
10	Málaga	Spain	West Med	475,745	410,314	53.69%

With the same purpose, elaborations on calls' number had been realized and the results are shown in Tables 7.8 and 7.9. As for the passengers and even with higher concentrations, there are many ports hosting both both traffic categories to deal with ferries much more than with cruises (the last port in this ranking presents a ratio of 98.43%). The 10 ports with the higher percentage of cruise calls on total calls show a different situation, considering that it's more frequent in this case to find ports with a more balanced ratio.

Table 7.8 MedCruise Port Members with the Highest Ferry Call Share on Overall Traffic

No.	Port	Country	Region	Cruise Calls	Ferry Calls	Cruise/Ferry Calls
1	Canarian ports	Spain	West Med	3	55,744	99.99%
2	Igoumenitsa	Greece	East Med	5	10,647	99.95%
3	Ceuta	Spain	West Med	6	7,350	99.92%
4	Messina	Italy	West Med	170	97,438	99.83%
5	Kavala	Greece	East Med	7	2,690	99.74%
